

## 2 - Schema Mapping (schemaMapper.xlsx)

**Purpose:** Standardise GPSIT field names into Zespri/SQL schema using an Excel mapping file.

### **Key points :**

- Mapping is configuration-driven (Excel), not hard-coded
- Field rename examples observed in transformed output:
  - kpin → KPIN
  - propertyname → KPIN\_Name
  - valuationnumber → Valuation\_Number
  - created\_date → Created\_Date
  - last\_edited\_date → Last\_Edited\_date
  - globalid → Global\_ID
